MANY dealers in produce having expressed their desire that a book similar to the one now presented to the public might be published, the Author was induced to undertake the task of furnishing one, not only for produce, but one containing many other tables, both useful and necessary. The utility of these tables can be doubted by no one ; on the contrary, the farmer, the merchant, and the mechanic, as well as the buyer and seller of grain, will find it of great advantage to possess the work. Aware of the responsibility of such an undertaking, the Author has spared no pains to render the edition now offered to the public, perfectly accurate ; and he trusts it will meet with the approbation of those for whom it is especially designed.

EXPLANATIONS.

PRODUCE TABLE.

The price of coarse grains, from twenty-five cents up to one dollar, and the price of wheat, from fifty cents up to one dollar and fifty cents, will be found at the top of the page ; and in the column headed " Value of Bushels," and " Value of Pounds," and directly opposite the number of the article in the left-hand column, will be found the amount of bushels and pounds respectively. In the merchandise column will likewise be found the amount of any number of articles, at the price placed at the head of the column.—On page 90, immediately following the produce tables, the price of merchandise is carried out to one dollar.

WOOD TABLE.

The figures at the top of each column represent the length of the pile ; those in the left hand column represent the height, commencing with one foot, and continuing down with necessary increase of feet and inches, until it amounts to nine feet. Directly in the line of the feet and inches in the left hand column, and under the length found at the top of the page, will be found the number of feet and inches required.

PRICE OF WOOD.

The different rates are placed at the top of the page, and the number of feet in the left hand column. Take the price per cord you wish to find, at the top of the column, and follow down until you come opposite the number of feet, and you will have the answer.

EXPLANATIONS.

TIMBER TABLE.

Find the diameter in the left hand column, and under the number of feet in length at the top of the column, will be found the number of feet required. Inches under six, not noticed—over six, called a foot.

INTEREST TABLE.

Find the amount in the left hand column, then follow the line of figures until you come to the column giving the number of days at the head, and you have the amount of days to one month; then, by adding together, you have the interest of as many months as required, on amounts from one dollar to one hundred.

HAY TABLE.

Find the price per ton in the left hand column, and follow in a line until you come under the number of hundreds at the top, and you have the price of any number of hundreds, from one to twenty.

STONE WALL MEASURE.

Find the length in the left, and the thickness in the right hand column; then follow down the column under the height, until you come to the line opposite the length and thickness, and you have the amount of feet required; then by adding or subtracting, you have the amount of any length, height, or thickness desired. Inches under six in the whole amount, not mentioned—over six, called a foot.
